

31.05.01.1. Animal Footprints Walkway

approx. 20 cm (D)

Our Animal Footprints Walkway can be used to teach children about an animal's prints and tracks. The customer is free to decide which animal will leave its trail. The playful challenge comes from kids having to balance their way along the walkway stumps. Depending on the little ones' age, the distance between the individual stumps can be increased in order to make things more difficult.
